AI and Computer Engineering student with experience in applied AI, data analysis, and experimental system development across academic, startup, and industry environments. Strong interest in research-oriented problem solving, technology development, and cross-functional collaboration. Co-founder of an AI startup with exposure to business strategy, operations, and stakeholder coordination. Comfortable working in structured organizations while contributing analytical and technical skills to multidisciplinary teams.

EDUCATION

CMKL University – AI and Computer Engineering (Expected Spring 2027)
Cumulative QPA: 3.8/4.0

Notable coursework: Neural Networks, Deep Learning, Information Retrieval, AI Applications, Linear Algebra, Inference Statistics

SKILLS

- Programming: Python, SQL, Java, C, HTML, CSS
- Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, Information Retrieval, Statistics, Predictive Modeling
- Software & Systems: Experimental Prototyping, Automation & Workflow Development, Performance Testing & Iteration
- Data & Analytics: Data Analysis, Feature Engineering, Model Evaluation
- Product & Business: Cross-Functional Coordination, Market & Feasibility Analysis, Documentation & Presentation, Financial Modeling, Business Strategy
- Design & Prototyping (Supportive): Data Visualization, UI/UX Design, Accessibility Design, Unity, Unreal Engine, Blender
- Soft Skills: Analytical Thinking, Research, Team Collaboration, Leadership, Project Management, Technical Communication

WORK EXPERIENCE

Co-Founder & Chief Financial Officer (CFO)

SONAR AI CO., LTD. | June 2025 - Present

- Co-founded an AI-driven audiobook platform focused on scalable content conversion and accessibility.
- Conducted financial modeling, pricing analysis, and market feasibility studies to support product decisions.
- Worked closely with engineers and designers to align technical capabilities with business constraints.
- Participated in external showcases and competitions; project received multiple awards.
- Gained experience coordinating across technical, creative, and non-technical stakeholders.

NOC Data Analyst (Internship)

Agoda Services Co., Ltd. | May 2025 – Aug 2025

- Supported analysis of large-scale operational and product datasets for internal reporting.
- Conducted data exploration and trend identification to assist decision-making processes.
- Worked within a production-scale, structured corporate environment, following established workflows.
- Collaborated with cross-functional teams, improving communication between technical and non-technical roles.

AI/Software Engineer (Apprenticeship)

CMKL University | April 2024 - Present

- Developed and tested AI-driven systems involving machine learning and computer vision.
- Managed multiple project timelines, balancing experimentation with deliverable requirements.
- Supported research-style workflows emphasizing iteration, validation, and documentation.

AI-Centric Designer (Internship)

CMKL University | April 2024 - August 2024

- Experimented with generative and image-based AI models for system prototyping.
- Designed controlled experiments to test parameters, outputs, and performance trade-offs.
- Worked closely with engineers to integrate AI outputs into functional prototypes.

PROJECT HIGHLIGHTS

Mirror Relexion AI

CMKL University | July 2025 – Present

- Built a real-time interactive visual system using TouchDesigner and dotsimulate's diffusion tox file integrated with computer vision and diffusion models.
- Designed pipelines that responded dynamically to live camera input and human movement using streamdiffusion and controlnet.
- Deployment variations for live events and summits.

SONAR-Audiobooks (Accessible Audio for the Blind)

CMKL University | July 2024 – Present

- Leading business strategy and partnerships.
- Developing an OpenCV-based guide for visually impaired users.
- Conducting financial projections and market analysis.

Harmony Vision (An AR Guitar Training App)

CMKL University | July 2023 - April 2024

- Designed an AR-powered platform for interactive guitar learning.
- Conducted market research to identify target users and adoption challenges.

Additional Projects

Completed several academic and personal projects involving machine learning, data analysis, and AI-based applications.

CREDENTIALS

- Character Design for Video Games (CalArts)
- Graphic Design (University of Colorado Boulder)
- Technical Support Fundamentals (Google)
- Introduction to Social Media Marketing (Meta)
